

## ENVIRONMENTALLY FRIENDLY, LIGHTWEIGHT NESTABLE PLASTIC PALLET

Decade Products manufactures and markets plastic pallets for industrial applications worldwide. Engineered of recycled plastic, our pallets are strong yet lightweight, corrosion resistant, durable, and environmentally friendly. Decade pallets are more cost-effective and user-friendly than pallets manufactured from wood, cardboard, and metal, because they are completely reusable and virtually maintenance-free.

These economical "one way" export pallets meet EU, Canadian and Asian customs requirements. Fully recyclable plastic, they are easy to clean and do not require fumigation as in the case of wood pallets. They will not increase in weight, harbor pests or sustain water damage, eliminating the expensive risks of refused entry or lengthy customs delays. Fully nestable pallets allow for maximum space savings. The 4-way entry design of all our export pallets provides easy access during handling.

- Cost effective
- Very light weight and low height
- Easy and safe to handle
- Excellently suited for air cargo
- Reduced freight charge by self assembly of snap-on bottom skids, volume saving up to 75%
- Maintenance-free
- Resistant to insects, bacteria and fungi
- Environmentally friendly product of 100% recycled plastic, completely recyclable

MDE 3-Runner Export Pallet Bottom
